Sump Pump Back Up Rebate Program

This program is being undertaken by Westminster Mutual Insurance in order to reduce losses caused by sump pump failure. Water losses have become the Company's #1 cause of property losses and increasingly so with the severe weather trends occurring in our area. Our research indicates that a sump pump backup system can be very effective in reducing and minimizing losses incurred by our policyholders. As a result, Westminster Mutual has researched a number of backup systems and is prepared to endorse the following systems:

1. Liberty Model SJ10 Back Up System – Municipal Systems

This system is designed for use with any residential sump pump system that is using the **municipal water supply**. This is a secondary pump which backs up your primary system in the event of a power failure or pump failure. This backup system works off the municipal water supply, will protect your basement during power outages and requires no electricity. Also included in installation is a backwater valve which is a device that prevents sewage in an overloaded main sewer line from backing up into your basement. A properly installed backwater valve will prevent sewage backup from coming out through other outlets such as sinks, toilets, showers, and laundry tubs. We enclose further details from the manufacturer and CMHC for your information.

2. Liberty Model SJ10 Battery Back Up System – Non-Municipal Systems (Rural)

This system is designed for use with any residential sump pump system which **is not** supplied by the municipal water supply. This is a battery operated secondary pump which backs up your primary system in the event of a power failure or pump failure. The system is also designed so that the battery is self charging. We enclose further details from the manufacturer for your information.

Cost of a Back Up System

The retailers noted below have quoted prices in the range of \$525.00 to \$680.00 plus HST (depending on the system purchased) for Westminster clients and includes installation. If purchasing the Battery Backup option for non municipal customers, please add \$100.00 to \$250.00 for the cost of the battery, depending on the battery purchased.

About Our Program

Should you purchase a system to back up your primary sump pump, Westminster Mutual Insurance will reimburse 50% of your expenses up to a maximum of \$250.00.

The following conditions apply:

1. The primary pump must be less than five years old and in good working order.
2. The battery back up system must be powered by a new battery.
3. To qualify, you must hold a property policy with Westminster Mutual Insurance for at least one year.
4. One rebate per insured residential property.
5. Your account must be in good standing.
6. Proof of purchase, as well as proof of installation from one of the retailers noted below, must be shown prior to receiving a rebate.

Approved Retailers in Your Area:

Elgin Pure Water Inc
22 Spackman Blvd, St Thomas, Ontario

519-633-1861
lakes@execulink.com

Elgin Pure Water Inc
29 Kilworth Park Drive, Kilworth, Ontario

519-657-1534
